

# WAR! What Is It All About?

HAS the whole world gone stark mad over a very foolish and trivial question? Are swords rattling, cannon rumbling, mailed armour clashing just because Russia wanted to show her love for the little brother—Serbia?

Tear aside the curtain of Europe's politics and see the grim and sinister game of chess that is being played. See upon what a slim, yet desperate, excuse the sacred lives of millions may be sacrificed. Read the history of the past one hundred years, as written by one of the greatest authorities the world has ever known, and learn the naked, shameful truth. Just to get you started as a Review of Reviews subscriber, we make you this extraordinary offer. We will give to you

## FREE!

**Duruy's History of the World**

Four splendid cloth volumes, full of portraits, sketches, maps, diagrams

Today is the climax of a hundred years of preparation. Read in this timely, authoritative, complete, AND THE ONLY CONDENSED classic world history—of which over 2,000,000 copies have been sold in France alone—just what has taken place in the inner councils of Europe during the past one hundred years. Read in these entrancing pages how Russia has for years craftily been trying to escape from her darkness—to get a vent-round open port, with its economic freedom. Read how Germany and Austria, fearful of the monster's latent strength, have been trying to checkmate her and how they have pinned all in this last, supreme stake.

### The Lesson of the Past

THIS master of the pen shows you the glory that was Greece's and the grandeur that was Rome's. He guides you through the Middle Ages, the picturesque old days of feudalism and the crusades; through the Renaissance up to contemporary history, which Prof. Guizot's compendium is brilliant evidence. In the story of the past, he reveals the secrets of today. And you will understand them better when you get the Review of Reviews for a year—for the Review of Reviews will give you a true interpretation of the events that are taking place with such rapidity. It is not enough to read the daily news reports. Your ability to comprehend conditions, and to discuss them rationally depends on a true interpretation of the meaning and the "reason why" of events. In your mind you must bring order out of chaos—and the Review of Reviews will do it for you.

### Get the REVIEW OF REVIEWS for a Year

Send No Money

Send the coupon only. It brings the whole set—four volumes—charges prepaid—absolutely free. All we ask is that—after you create books and like them—you send 25 cents for shipping and \$1.00 a month for three months to pay for the Review of Reviews. If the books aren't worth more than you pay for books and magazine together, send them back at our expense. But be prompt. The world-wide fame of Duruy will make these 5,000 sets disappear from our stock room at once. Send your coupon today—and be in time.

Review of Reviews Co., 30 Irving Pl., N.Y.

In jars 35c., 50c., 85c., \$1.50.

When you insist upon Daggett & Ramsdall's you get the best cold cream in the store.

## LIVE STOCK

### FEED MIXER IS CONVENIENT

Barrel Swung on Pivots by Extending Round Wooden Axle Through It—Is Easily Moved.

A farmer who feeds a number of hogs uses several feed mixers, such as shown in the accompanying illustration, says Farm, Stock and Home. A barrel is swung on pivots by either extending a round wooden axle through the barrel, as at B, or by fastening iron trunnions to opposite sides of same with bolts. The barrel is then suspended in the air in the wooden frame, as illustrated. Feed of all kinds that is mixed with water may be quickly mixed in this device, and as quickly emptied in the trough D.

Handy Feed Mixer.

by raising the barrel and tipping the feed out in the trough. The tipping handle is shown at C, and a water pipe with tap at A. Two men can easily move this device.

### HARM BY ANIMAL PARASITES

Some of These Insects Create or Manufacture Injurious Toxins—Others Transmit Disease.

(By H. S. EAKIN, Colorado Experiment Station.)

Too little attention has been given in the past to the importance that animal parasites have in relation to the health and well being of our domestic animals.

Very few, if any, animals are ever free from parasites in some form, and many are infested with parasites, of a very harmful nature. Parasites are found in many different tissues, as the brain, sinuses of the head, air passages, lungs, liver, stomach, intestines, muscles, blood, etc., and externally on and in the skin, in the ears, etc. Some of these cause mechanical disturbances, others create or manufacture toxins which are injurious to the animal infested, some transmit diseases. Some animals may carry one form of parasite which may later infect other animals of a different species in a different form. Some of these parasites are transformed from animals to man and vice versa.

Animal parasites annually cause great pecuniary loss, and for other reasons briefly enumerated above, more attention should be accorded the domestic animals; and should any suspicion be directed to an animal, competent veterinary advice should be immediately secured.

### FEEDING CORN ON THE STALK

Unbusinesslike Method of Turning Pigs Into Field and "Reckon" They Are Doing Well.

More corn on the stalk will probably be fed to hogs this year than ever before. It is not a great deal of satisfaction to see a bunch of shoats doing well in standing corn and not know what price they are paying for the corn. We wouldn't sell corn as a rule to any man on that basis, but a good many of us seem to be willing to "reckon" that the hogs paid a pretty good price for the corn and let it go at that. Handy stock scales are too important a part of the farm equipment to be without, considering their cost and the great educators they are. To be able to state in pounds what crops and live stock produce is just plain business. To be forced to give an estimate in terms of "pretty good," or "poor," or "fair," or others as indefinite says plainly "I am a generation or more behind time."

## LIVE STOCK NOTES

A heavy coat of hair is a burden to a road horse.

There is no profit in letting the colts lose their colt flesh.

If the pigs are cold and pinched they can make no gain.

The sheep is a dual purpose animal, producing both wool and mutton.

There is every reason for watering stock before they are full of dry feed.

If pigs could talk they surely would say, "Balance our ration and watch us pay."

Hogs are not provided by nature with hair to protect them from cold and drafts of icy air.

Feed that suits one animal may starve another. Study individual taste among the live stock.

If we could once and for all rid this country of hog cholera what a wealthy nation we would become.

Means of Offense and Defense. Many reptiles use their tails to strike down their game, while a large number of animals are supplied with pungent odors or secretions that are equally potent as a defense. In certain groups we find enormous horns and tusks that are intended entirely for purposes of protection. In some cases they are upon the top of the head, as in our cows or oxen. Again, as in the elephant or some cetaceans, they are highly developed teeth.
